

Paid Presell #2: Quiz Funnel

ICP: the same person as the free trial page. A UK full-time worker doing 40 to 45 hours a week who wants extra money now and quietly wants out. Same ads, same offer, same £20 store.

Why a quiz instead of a page: a listicle asks him to read. A quiz asks him to tap. Every tap is a small yes, and by question 7 he has told us he wants £3,000 a month and can spare 5 hours a week. He talks himself into it, and the price only appears after he has put effort in.

The flow: Ad → Page A (the quiz) → Page B (the result) → the product page with the £20 Multi-Product Standard variant preselected.

Static, not dynamic. Every path through the quiz ends on the same result. One result page, one avatar, no branching.

PAGE A: THE QUIZ

One URL. Every screen below loads in place. One question per screen, two to five tappable answers, tapping an answer advances automatically. No typing, no back button, no email.

[Appears after question 5. A simple profit breakdown graphic: £39.99 in, £9.99 out, £30 kept.]

Here's how the money actually works.

A customer pays **£39.99**. Your supplier charges **£9.99**. **You keep the £30.**

1 sale a day is about £900 a month. 3 sales a day is about £2,700 a month.

You never pack, post or touch a parcel. The supplier ships every order automatically.

THREE QUICK QUESTIONS

"How is it only £20?" We're official Shopify Partners, and Shopify pays us when your store makes real sales. That's why we can build it for £20 instead of £1,000. **We only win if you win.**

"Do I need any experience?" No. There's nothing to build and nothing to design. Your store arrives finished, with the products chosen and the suppliers linked. **If you can use a phone, you can run it.**

"What if I don't make any sales?" Then you don't pay. 50 sales in your first 90 days or your £20 back. **You take zero risk.**
